

Please take steps to PROTECT New Jersey's Do Not Call legislation. Before this law was enacted, our home life was a nightmare: we would receive as many as five calls from telemarketers each evening, and our answering service was filled with similar calls or "computer hangups" from bulk dialing systems. Since registering with New Jersey's Do Not Call Registry, the number of such calls has dropped to less than one each day. We have our life back! Please ensure that the citizens of New Jersey CONTINUE to be protected by this law. Thank you.
